

ASE Sprint 1 Progress Report

1 KEYWORDS

ideation, organization, technology stack, architecture, visualization, environment setup, user authentication, registration, login, discussion, pair coding

2 PROGRESS SCORE: 3

3 COMPLETED ACTIVITIES

3.1 IDEATION & ORGANIZATION

- took initiative to lead group in right direction and find project idea
- pitched my idea, group was very intrigued, started to suggest possible modifications and extensions
- suggested that we should meet once a week at least
- set up a WhatsApp chat for communication
- signed us up as a group and came up with team name

3.2 TECHNOLOGY STACK, ARCHITECTURE & VISUALIZATION

- Adam, Jerome and I as backend team, Alessio and Kristijonas do frontend
- Adam has the most experience, he suggested technologies for backend
- I have a lot of experience with frontend, so I wanted to challenge myself, do something new
- lots of time and effort went into understanding tools and technologies we use for project
- 2,5h meeting for drawing up sketch of backend, which parts communicate how

3.3 ENVIRONMENT SETUP & IMPLEMENTATION

- first time using docker, lots of time invested for getting setup to run
- discussions about endpoint declarations
- implementation of authentication
- implementation of user registration and login

4 CURRENT ACTIVITIES

- modifying users: possibility to edit profile data & password, should be finished end of next week

5 GOALS

- searching users
- following / unfollowing other users
- reviews
- feed
- maybe also start on map integration with places
