Keywords: Setup, Mockups, Components, Registration

Overall progress: 4

### Items carried out in Sprint 1

- Setup for microservice ms-frontend (vue project).
- Created mockups for components including among others Button, Checkbox, Textfield, Menu components.
- Created mockups for Sign Up, Profile, Settings, Friends views.
- Recreated Button, Checkbox and TextField styling in frontend based on mockups.
- Implemented Registration in frontend.
- Created github issues based on requirements and user stories created during planning.

### Transitioning activities:

- Creating mockups for looking at reviews and commenting on reviews

Due: 24.03.2024

### Activities for next deliverable:

This list might change because of the updated sprint planning performed at the next sprint meeting.

- Settings page
- User onboarding (specifying initial preferences)
- Continue working on mockups for views and components
- Continue to recreate components in the frontend project based on mockups

### Immediate actions:

Currently there are no immediate actions
